

Every year, it takes 17 million barrels of oil to make water bottles,

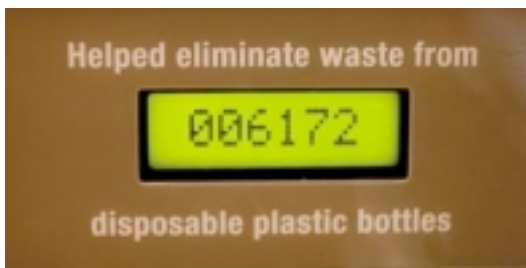

as well as 3 times the amount of water in a bottle to

And every year, 38 billion water bottles go into

That's why Boston Latin School is going **green** with **Elkay** water fountains!

Elkay fountains are beneficial for the school and the environment because:

- **The fountains can fill a bottle in 6 seconds—three times faster than a traditional drinking fountain!**
- **The electronic sensor lets you fill a bottle hands-free, in a highly sanitary way.**
- **The fountain has 3000 gallon filter, approved by the NSF for taste, odor and lead reduction.**
- **The fountain also protects against mold and mildew growth.**
- **One-handed operation allows for a quick fill between activities—or classes!**

Plus, the Green Ticker feature on fountains counts the number of 12 oz. or 16 oz. bottles saved from land fills!

So far, there are plans in buy four new fountains for the school!

BLS YouthCAN will also give out FREE water bottles to every student to encourage reusable bottle use and minimize buying new water bottles.
